

LEONARDO DA VINCI - EL INVENTOR

Los extraordinarios diseños de máquinas que Leonardo da Vinci plasmó en sus cuadernos se materializan en esta exposición.

La capacidad de observación de Leonardo, su espíritu curioso y práctico, su continua experimentación, su originalidad... son rasgos que configuran una personalidad apasionante, la de un hombre que supo adelantarse a su tiempo.

Nacido en 1452, en pleno Renacimiento italiano, Leonardo tocó con acierto multitud de temas, de la anatomía a la botánica, de la pintura a las matemáticas. Como ingeniero, diseñó máquinas, herramientas, relojes, automatismos, medidores, barcos, máquinas voladoras, instrumentos musicales... un legado de ideas y proyectos que se desarrollarían con éxito muchos años después.

LEONARDO DA VINCI - THE INVENTOR

The extraordinary machine designs that Leonardo da Vinci drew in his booklets are on display in this exhibition. Leonardo's observational skills, his curious and practical spirit, his ongoing experimentation and his originality are all features that show him to be a passionate spirit and a man who was well ahead of his time. Born in 1452, in the middle of the Italian Renaissance, Leonardo set his mind working on a variety of themes from anatomy to botany, from painting to mathematics. As an engineer he designed machines, tools, watches, automatons, measurement devices, boats, flying machines and musical instruments. He left a legacy of ideas that would be developed successfully centuries later.
